Association of Designers, Manufacturers and Users of Equipment and Applications Based on Global Navigation Space Systems

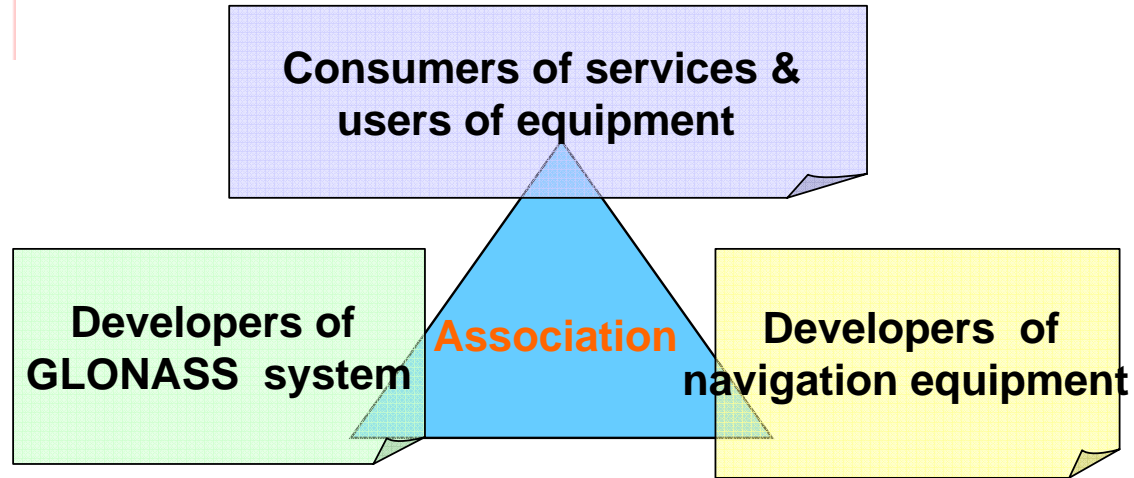

Уральские радиостанции

Members & partners

Aims and purposes of Association

- ✓ promotion of navigation technologies based on GLONASS/GPS systems
- ✓ **coordination of Association member's activities in order to prevent unfair competition and to improve the quality of life for Russian citizens**
- ✓ participation in development of state policy for commercial use of GLONASS system and recommendations of priority directions for the future development
- ✓ assistance in **attraction of investments**

Projects of Association

- With support of Association ROTOBO was organized visit to Japan concerning creation and operation of intelligent transportation systems (March, 2008)

- annual international satellite navigation forum (April, 2008)

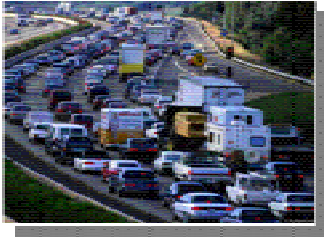

- intelligent transportation systems international forum (May, 2008)

- Sharing in the work of International committee on global navigation satellite systems

Projects of Association

- to initiate the creation of safety road system in Russia Federation and implementation of ITS basic units
- Voluntary certification system of goods, services and quality management in the sphere of navigation, monitoring and safety - “BAZIS”

- Internet magazine on satellite navigation “Integrated satellite navigation systems”
- development of training programs

Cooperation

- ❑ designing, development and production of chipsets, users equipment based on GLONASS/GPS
- ❑ development of software products

- ❑ creation of vehicle information control system
- ❑ creation of devices for determining road congestion
- ❑ application of navigation technologies in the sphere of transport, building, etc.
- ❑ information cooperation
- ❑ investments
